THE METALLIC PAINT, produced by

the PATENT ALKALI COMPANY, has been extensively used for several years on farm buildings, iron bridges, roofs, and railway shipping, &c., and it is universally admitted that it covers a greater surface than any other pigment, and stands far better on wood, iron, Aluthow lime, and Roman cement, than the ordinary paints. Fine black, 32l. per ton; rich purple brown, 20l. per ton. Company's Offices, 1, New Broad-street, London.

JOHN A. WEST, Secretary.

PATENT WHITE ZINC PAINT.—

JOHN WARNER and SONS are prepared to supply this paint to builders, painters, and plumbers, on wholesale terms. It is free from all poisonous qualities; it is unaffected by bilge water, sulphuretted hydrogen, or any of the gases; and preserves its original colour where white lead paint will not.—Prospectuses to be had at J. Warner and Sons', 8, Crescent, Jewin-st., London.

PATENT WHITE ZINC, ANTIMONIAL,

and other metallic PAINTS, greatly improved in the manufacture, may now be had in any quantity; also whitelead and painters' materials of every description.

Wholesale buyers and the trade supplied on liberal terms.

VAUGHAN and SYMONDS, Southwark Steam Colour Works, Stones-end, Borough, London.

HUBBUCK'S PATENT WHITE ZINC

PAINT.—ANNOUNCEMENT.

For MARINE USES, it possesses the following advantages:—It is whiter than any other Paint, and retains this whiteness for years unaffected by bilge-water, or noxious vapours from cargo. The White Paint in the hold of a ship, after discharging a large cargo, is found to be as white as the year before, when newly painted. Under these and other circumstances, when every other paint hitherto known and tried has failed, the "White Zinc Paint" has preserved the freshness of its colour. Moreover, by virtue of its galvanic action on iron, it enters the pores, and forms an amalgam of the two metals, which protects the iron from rust, decay, or incrustation.

For the GENERAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unparalleled in whiteness, clearness of colour, durability, and beauty of texture. It becomes so hard as to admit of [illegible] polishing equal to the finest coach panelling.

For SANITARY PURPOSES the "White Zinc Paint" is valuable, not only from its being totally free from every ingredient injurious to health, but from its combining chemical qualities which render it a powerful corrective where contagious diseases have prevailed; furniture or buildings painted with it are at once disinfected. Paralysis and Painters' Cholic are avoided by its use, as well as similar results to the occupants of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children of the most delicate constitution. It becomes cheaper than common paints, from its spreading over a much larger surface. 2 cwt. of this paint covers as much as is usually covered by 3 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London—Patent," as the style of the Manufacturers. Circulars with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Dock.

PURE PATENT WHITE ZINC PAINT

of the VIEILLE MONTAGNE ZINC MINING COMPANY. This Company having become Proprietors of all rights and patents of the late Patent White Zinc Company in France and Belgium, are prepared to FURNISH, on a large scale, the WHITE OXIDE of ZINC in a PURE STATE, and of a quality which can only be manufactured from the Zinc from their Mines in Belgium. The Patent White Zinc Paint is superior in every respect to white lead paint. It is entirely free from all poisonous influences, and is unaffected by sea-water, sulphuretted hydrogen, or any gases; besides, it preserves its original colour, which white lead paint does not. The zinc paint causes none of those ravages inevitably caused by white lead upon the human frame; neither cholic, nor paralysis, &c. &c., to which dangerous complaints workmen who manufacture and use it are subject, and also persons who inhabit newly painted apartments are also liable. A spurious article having been introduced in the market under the name of White Zinc Paint, the Public is cautioned against it, because, when adulterated, it becomes a very inferior paint instead of a first rate one. For further particulars and Prospectuses, apply to Mr. M. F. SCHMOLL, general agent for England and Scotland, at the Company's Offices, 13, Manchester-buildings, Westminster.
